	<i>28-30th Chicago, IL.</i>	<i>ASSP Professional Development Conference</i>

Won't you please join us? We are back in person at the Sheakley building (1 Sheakley Way, Cincinnati, OH 45246)

APRIL MEETING TOPIC: COMPANY TOUR of Paramount's King's Island

Date: Tuesday April 26th

Meeting time: 12:00 PM – 1:00 PM

Description: This is a great opportunity to get behind the scenes at Paramount's Kings Island Amusement Park. This will be a guided tour. Please follow the following instructions if you can attend.

Visitors should come in the associate entrance (either turn onto Soak City Drive from Kings Island Drive and turn left on One Team Way or enter at Columbia Road / One Team Way from Western Row

Road). They can follow One Team Way to Security Post 2, turn left and park in the Associate parking lot. If everyone can meet outside of Security Post 3, someone from my team can escort them in.

Video cameras are not a good idea. Cameras are okay, but there may be some things we ask not to photograph.

No PPE is required for the areas we will be touring, and, if required- we can supply.

Location: 6300 Kings Island Drive, Kings Mills, OH 45034 is the best GPS.

Registration: <https://swohio.assp.org/event/>

THERE IS STILL TIME IF YOU ACT NOW!

***Get Your Team Together and Get a Discounted
Entry Fee!***

*SAVE \$100 on Team registration if you
sign up before April 30, 2022!*

OTHER CHAPTER FUNDRAISERS

Hello Central Ohio Chapter Members and Affiliates!

For the last 14 years the Central Ohio Chapter of the American Society of Safety Professionals has held a golf tournament in support of our student scholarship fund. This year we are excited to announce that all proceeds from this tournament will be donated to the National ASSP Foundation Scholarship. We are excited to hold this tournament again this year after pushing through the adjustments that everyone has been making throughout COVID.

We thank you for your continued support and encouragement to this organization either through membership or network. We excited for the future of the EH&S profession! We understand with the complications still presented with the pandemic there are concerns; we are actively ensuring that this event falls within the guidelines and restrictions needed to keep everyone safe. The tournament is planned for **May 20th**.

Event registration, sponsorship packages, and details are in the link below and attached to this message. If you have any questions, please don't hesitate to reach out. We look forward to seeing you on the green!

Plant Tour

Kings Island Amusement Park has graciously opened their gates to allow us a tour of their campus on April 26th.

If you and your company would be willing to host a plant tour next year, please let Brad Weber (Brad.Weber@sheakley.com or (513-314-0042) know and we can make arrangements to get it on our meeting calendar. That is a great opportunity to network with other safety professionals as well as share ideas and innovations across industries.

UPCOMING PROFESSIONAL DEVELOPMENT SEMINARS

Discover solutions to your greatest occupational safety and health (OSH) challenges at the premiere annual safety education event in the industry. Take advantage of top-quality safety education options at the conference, along with countless opportunities to network with thousands of attendees across all job roles, industries, experience levels, geographies and demographics.

The Safety 2022 Professional Development Conference and Exposition will take place June 27 - 29, 2022, both online and in-person in Chicago, IL.

CAREER CORNER

Job description (*Please contact Melissa Rupert if you're interested in applying.*)

At SevenGen, we believe that "*in every deliberation, we must consider the impact of our decisions on the next seven generations*", and that includes considering the impact of our work on the lives and futures of both our employees and our clients.

SevenGen is seeking a talented and motivated industrial hygienist for an exceptional full-time opportunity supporting the EHS Team at GE Aviation. You will be working at the GE campus located in Cincinnati, Ohio, while supporting GE's team of highly skilled Environmental, Health & Safety (EHS) professionals. You will be assisting in the management of industrial hygiene programs at a world-renowned organization that is known for their position at the leading edge of science and technology. Successful applicants will be vetted and hired through SevenGen.

What does your workday look like?

If you're looking for variety in your next position, then this is the job for you! In this job you will be heavily engaged in a diverse environment of occupational health hazards. Your workdays may be spent doing the following:

- Conducting personal noise dosimetry measurements on workers and completing area sound level measurements in a variety of areas. You will apply dosimetry results against applicable regulations and industry standards, recommend noise abatement measures as applicable.
- Performing heat stress surveys using wet and dry bulb thermometers and making recommendations regarding work safety in inclement weather.
- Performing various regularly scheduled and ad hoc onsite safety and industrial hygiene compliance audits at the Evendale campus and other GE Aviation sites, as needed. While these audits will be performed under the supervision of a GE IH, you will need to work autonomously in many instances.
- Working with GE Departments such as Security, Fire Protection, Test, Facilities, Manufacturing etc. to meet site specific EHS, security, and area-specific operational requirements.
- Assisting in maintaining GE Evendale's OSHA Voluntary Protection Program certification by sitting on GE VPP teams. You must be able to assist in the preparation of GE's records for VPP audits and answer questions about the GE industrial hygiene program in order to assist GE as needed during OSHA VPP audits.
- Assisting GE EH&S with incident investigations involving injuries, property damage, security concerns, etc.
- As needed, using instrumentation to measure for radiation sources and performing surveys of the equipment onsite containing radioactive sources and report the survey results. You will need to interpret the results against applicable regulations and industry standards.
- Performing comprehensive surveys for asbestos-containing building materials, perform thorough post asbestos abatement visual inspections, collect post abatement air samples per AHERA. You may not be certified, but you must be willing to obtain your certification.
- Collecting air, bulk and wipe samples for lead, and using X-ray fluorescence devices to measure the lead content of building materials.

What skills will you need?

You must be a well-rounded industrial hygienist with multi-faceted experience in core industrial hygiene skill sets. What does that mean? Let's take a look -

- Chemical exposure monitoring
- Equipment calibration and maintenance
- Chemical approvals and safety data sheets
- Indoor air quality assessments, including mold
- Occupational noise monitoring, including personal dosimetry and sound level measurements
- Bloodborne pathogens and familiarity with exposure control programs
- Heat and cold stress
- And more!.

What skills would be helpful? (a plus but not required)

In a field as diverse as industrial hygiene, it's likely that you are not an expert in everything. That said, there are skills that will be helpful in this job, and if you do not currently possess these skills, you must be willing to learn and become proficient in them. This might include:

- Being Certified by the Ohio Environmental Protection Agency as an Asbestos Hazard Evaluation Specialist.
- Performing Lead inspections and using X-ray fluorescence equipment for lead assessments of building materials
- Performing ionizing and non-ionizing radiation surveys
- Having a working knowledge of laser safety, including measuring laser output
- Experience working in a strong union environment

Who is our Candidate?

We are looking for a confident IH professional who:

- Able to identify health hazards and recommend strategies for reducing exposures
- Is poised under pressure and is able to confidently speak about health and safety regulations relating to industrial hygiene.
- Is personable, carries a conversation easily and is able to work in collaboration with others.
- Is able to participate in meetings at GE and address identified health issues and mitigation strategies
- Has excellent communication skills and can engage in conversation with individuals at all levels and address a diverse group of needs
- Is able to successfully build trust and navigate potentially difficult conversations
- Is able to work autonomously with regular communication to safety team and Senior Leadership.
- Shows strong initiative, working effectively without close supervision.
- Acts quickly and decisively and demonstrates confidence when addressing difficult issues.
- Is a team player with the ability to drive results and to motivate/manage the performance of others.
- Demonstrates determination and persistence, has a high level of resilience and the ability to cope with pressure, refusing to give up when faced with difficulty, and continues steadily and firmly to achieve the business objective.
- And who is genuine, open, honest, and straight-forward and appreciates direct personal communication.

Does this describe you?

Experience and Qualifications

We hope you will consider applying for our open position if you have the following:

- At least 3 years of industrial hygiene experience in a manufacturing, construction and/or consultant setting.
- Bachelor's degree in a core science, safety, industrial hygiene, engineering or other related technical field.

*would consider an Associate's Degree for a candidate with the right industrial hygiene experience.

Job Type: Full-time

Thanks,

Shelly Przybylski
